

FTC,

This is not a fair law and should not be passed. We are women and men trying to make ends meet in a world that requires dual income households!!! This will be hurting our ability to stay home with our children, (earn money for college, retirement, supporting our household) and earn a fair income by causing mistrust and dis-illusion in future prospects.

My business and ability to earn an income for my family should not be hurt because of a small percentage of offenders. Do you realize what Direct Sales has done for Women? The impact it has made to our individual households? The Self Esteem it has given the battered wife and enabled her to get out of her negative situation?

I truly believe that you will be hurting our way of life and this should not be passed! Many women/men will be forced into getting a job outside the home and enrolling our children in day care-----if we can afford it!

Sincerely  
Brandi Lee
